

Resilient Ratties Activities – Sound Mapping

Lucy loves listening to all of the different sounds she can hear outside! Use the sound map below to see how many different sounds you can hear.

Draw yourself (or write your name) in the middle circle then find somewhere to sit outside. Listen very carefully and draw or write down all of the sounds you can hear on your map. Place the sounds where you think they are coming from – are they behind you? In front of you? Near or far? How many different sounds did you hear?
